LL.B.

Thammasat University, 2025

SELECTED EXPERIENCE

1. Projects, Infrastructure, Public-Private Partnerships, and Concession

- Representation of the first and largest mass transit and monorail operator in Thailand in connection with the legal strategic planning and negotiating of the implementation government's new public transport fare policy in the Green Line project, the largest mass rapid transit network across and connecting Bangkok to the surrounding provinces with an estimated valuation of THB 505.69 billion.
- Representation of the first and largest airport concessionaire in Thailand in connection with the development of new airport facilities at U-Tapao International Airport as a part of the Eastern Economic Corridor of Thailand development, including the development of a new terminal, cargo, maintenance, repair, and overhaul (MRO) and other airport facilities as well as the preparation of the master plan of the project. This project is the first airport concession project under the public-private partnership scheme in Thailand and the largest concession project in Thailand with an estimated value of THB 300 billion.
- Representation of the one of the largest of property and infrastructure developers in Thailand in planning of the development of the THB 300 billion Eastern Airport City at U-Tapao International Airport, the first aerotropolis in Thailand, providing a comprehensive legal and public-private partnership framework for its development as well as a negotiation for special privileges including: special tax privileges, visa and permits, and the unprecedented 24-hour places of entertainment operation. The aim of the Eastern Airport City is to serve as a regional aviation hub, tourist destination, and logistics center in Thailand, boosting Thailand's economy in the long run.

2. Government & Regulatory

- Representation of the government agency on Public-Private Partnership in proposing the amendment and guidelines to Public-Private Partnership Act B.E. 2562 (2019) following its fifth year of implementation to identify its current practical challenges to prepare for the subsequent amendment for it to achieve its goals in enabling the investment in various new infrastructure projects as well as providing seminars for officials of the relevant state agencies.
